What is important to me?

Being effective in my approach to anything I undertake is important to me. Building solid business relationships that are founded in knowledge and understanding.

That I believe **EVERYONE** has something to contribute and that I am a vehicle and team player at Montage that works to make things happen.

That I want to be the change I hope to see in the world.

That I always bring the best forward so that viewers, readers, listeners, thinkers, believers and disbelievers understand the impact that one person can make when they come together with like-minded minds for the benefit of others.
